

# WE ARE MACMILLAN. CANCER SUPPORT

We have produced the Macmillan Cancer Books Core List in collaboration with Macmillan Professionals in the Cancer Networks to help public libraries improve the quality and reliability of the cancer material they stock. The books' subject matter includes information about cancer itself and people's experience of living with cancer.

All the books on the list meet key quality criteria including having been reviewed favourably by our book review panel that includes health professionals and people affected by cancer.

The list is not prescriptive but intended is to enable libraries to make informed choices between the very wide range of books available, which can be of variable quality and accuracy.

We shall review and update the list regularly and would welcome suggestions for how we might improve the list including adding books that deal with subjects not covered by the list currently. Additional electronic copies are available from [amaynard@macmillan.org.uk](mailto:amaynard@macmillan.org.uk) and our website [www.macmillan.org.uk](http://www.macmillan.org.uk). The electronic version of the list includes links to on-line reviews of the books.

# Macmillan Libraries Core Books List
